

ZTBG03 - ZT Balanced Diver Gun

Specifications and Options

This cutting-edge industrial innovation represents a formidable solution for the meticulous task of thorough cleaning. It excels in efficiently removing various forms of marine fouling, while preserving the integrity of protective coatings. This versatile ZT Gun can be precisely configured to accommodate a spectrum of operational requirements, offering tailored thrust configurations such as 50-50 thrust ratios.

Each CaviBlaster ZT Gun / Lance is meticulously designed with an internal configuration that is unique unto the unit it is paired with.
